SWITCH & ENERGY

WI-R1S1-P

NEW FUNCTIONALITY PREVIEW OF HISTORICAL ENERGY CONSUMPTION DATA

SWITCH & ENERGY Allows you to turn on and monitor the connected electrical device - voltage, current, power, energy consumption. You can run most of home appliances with it. Mounted under the light switch, it gives the ability to control a single lighting circuit..

- 1-channel 230 V relay with a rated load of 10 A and a maximum load of 16 A;
- Possibility to connect a local control button and set its function;
- Network parameters monitoring: voltage, current, power (active and reactive), energy (active and reactive);
- Controlling the receiver using a mobile application and timers;
- Built-in clock with power backup and own copy of the work program, guaranteeing correct operation also without connection to the Wi-Fi network;
- REST API support for integration of the controller also with other home automation systems;
- Built-in thermal protection;
- Convenient installation in a Ø60 mm junction box.

NEW

3-PHASE POWER CONSUMPTION MONITOR

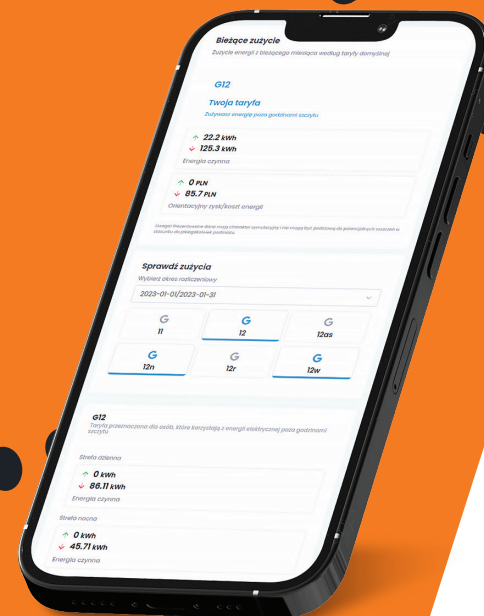

MONITORING OF ALL RELEVANT PARAMETERS OF THE ELECTRICAL NETWORK.

FOX ENERGY 3 enables registration of energy consumption and monitored network parameters. access to data is possible directly from the application level or through any web browser.

- 3-phase, 2-way, 4-quadrant electricity consumption monitor, perfect for monitoring photovoltaic installations, among other things;
- Monitoring of all relevant electrical network parameters;
- Recording of average, minimum and maximum values;
- Non-invasive installation using miniature (26×26×40 mm) current transformers;
- Measuring range up to 40 A, suitable for domestic installations;
- High measurement accuracy;
- Access to measurement history via app or web browser;
- Communication via home Wi-Fi network and remote access via the F&F Polish cloud;
- Free mobile apps for Android and iOS;
- Fully Polish solution focused on security and user privacy;
- No hidden running costs and guaranteed long-term product support;
- Mounting in a distribution box (DIN rail);
- Including 3 current transformers and an antenna.

NOTICE!:

FOX ENERGY 3 is a part of a bigger WIFI intelligent relays family.
